

# 322 Compilers Assignment: 5-test

## Testing Closure Conversion

Due Thursday May 19th, noon

**Your job:** Write test L5 programs and equivalent L4 programs.

**Handin instructions:**

Hand in your assignment by sending email with the subject `5-test` to `robby@eeecs.northwestern.edu`. The email should include a `.tar.gz` attachment that contains (at the top-level) a directory called `5-test`. The directory should contain pairs of files, an input file with the suffix `.L5` and a equivalent output file with the suffix `.L4`. The result does not have to match exactly what your compiler ends up producing, but the two programs should behave equivalently in the two interpreters.
