OOD Road Map

- The Rules
- Examples
The Rules

1. Only extend classes that are explicitly designed for extension. How can you tell? There must be at least one virtual function. If you aren't overriding it then you don't need inheritance.
The Rules

1. Only extend classes that are *explicitly designed for extension*. 
The Rules

1. Only extend classes that are *explicitly designed for extension*.

How can you tell? There must be at least one *virtual* function. If you aren’t overriding it then you don’t need inheritance.
