VIRGIL

Simone Campanoni

simone.campanoni@northwestern.edu

Software framework: VIRGIL

- Git repo: <https://github.com/scampanoni/virgil>
- You need a compiler that supports at least C++14 (e.g., LLVM 9.0.0)
 - On `hanlon.wot.eecs.northwestern.edu`:
`LLVM_HOME= /home/software/llvm`
`export PATH=$LLVM_HOME/bin:$PATH ;`
`export LD_LIBRARY_PATH=$LLVM_HOME/lib:$LD_LIBRARY_PATH`
 - On `peroni.cs.northwestern.edu`
`source /project/extra/llvm/9.0.0/enable`
- Try to compile and run the tests in VIRGIL
 - `$ cd tests`
 - `$ make`

Always have faith in your ability

Success will come your way eventually

Best of luck!
